2061 6,3 mm (1/4") Reversible Ratchet Z90, MATADOR 20610090, The new Z90

2061 **6,3 mm (1/4") Reversible Ratchet Z90, MATADOR 20610090, The new Z90**

Beschreibung:

It takes something more to make a really good ratchet

More teeth. More power. More grip. More applications. More design.

Since the presentation of **the first reversible ratchet back in 1919** MATADOR has been intensively dealing with drive technology. MATADOR ratchets have been developed for professional users. They are proven **millions of times** and **well-known for their solid workmanship** and **durability**. But what features must the ideal 21st century ratchet have?

We thought a lot about how we can stay true to our line and at the same time create an innovative, real master piece.

The result is our new „Boss“: the ***Z90.*** **Aggressive in appearance, outstanding in function, with a rich sound and uniquely ergonomic**. With the new **Z90** every screwing task becomes an experience.
The ***Z90*** has a little more of everything. **More torque** (50% more than requested in the DIN standard), **more teeth** (25% than standard fine-toothed ratchets), **more applications** thanks to its especially small swivel angle of only 4°, **more grip** with its ergonomic, hand-friendly handle made of several components and lust but not least: **More Design**.
No frills but classic in shape and **with aggressive details**. Made of high-alloyed chrome vanadium steel and fully CNC machined the ***Z90*** stands for precise production competence. Tested for at least **30,000 tightening cycles** it is made for the long haul - just a typical MATADOR.
